

Division of MH/DD/SA Services
Consumer Data Warehouse (CDW)
LOCAL MANAGEMENT ENTITIES (LME)
Reporting Requirements
October 1, 2008, Version 1.11

Overview

In July 1999, the Division of Mental Health/Developmental Disabilities/Substance Abuse Services (MH/DD/SAS) replaced the old Client Information System with a modern Consumer Data Warehouse (CDW). The CDW is the data repository for demographic, clinical, outcomes and satisfaction data about clients served by MH/DD/SAS. The data stored in the CDW is the primary source of information for Mental Health Block Grant (MHBG) and Substance Abuse Block Grant (SABG) reporting as well as Legislative requests. Additionally, the CDW provides a rich source of information for planning and evaluation of the MH/DD/SAS Services provided to the citizens of North Carolina.

In an effort to reduce data redundancy and to improve reporting capabilities the CDW is undergoing substantial changes in the area of data integration. In addition to the data submitted to the CDW by the LME's, data extracts taken from secondary data sources such as IPRS, NC-TOPPS, and Consumer Satisfaction Surveys are now being integrated and stored in the CDW. The integration of these new data sources is possible through the utilization of the Department of Health and Human Services (DHHS) Common Name Data Service (CNDS).

This document contains the Reporting File Formats with associated data dictionary names and data value edits.

Summary of Key Characteristics of the CDW

- All data must be reported electronically; no paper forms are accepted
- Records with fatal errors (see File Format section below) will be returned to the LME electronically and must be resubmitted electronically.
- Data may be submitted daily, weekly, or monthly
- Data is expected to be updated periodically; it must be sent more frequently than on admission (see below for expected schedules)
- Files must be sent in standard Electronic Data Interchange (EDI) format - a single file with multiple record types, and should be ordered in the same sequence in which it was transacted.
- Data fields may be Mandatory, Required, or Optional
- "Data Dumps" are available upon request

File FormatsData Element Edits

1. If a field is MANDATORY in the Reporting Requirements and a blank or invalid value is sent, the record will be rejected and returned to the LME electronically. The LME must then correct it and resubmit it electronically.
2. If a field is REQUIRED in the Reporting Requirements, the Division expects to receive it with the record. The record will be accepted without it, however, periodic reports will be issued to indicate which of these data elements is missing or incorrect and must be fixed.
3. If a field is OPTIONAL in the Reporting Requirements, the record will be accepted without it and periodic reports will not be issued to indicate which of these data elements is missing. This field was included to conform with the recommendations of the Mental Health Statistical Improvement Program (MHSIP); it could be required in the future.
4. It is required that all alphanumeric fields be left-justified and padded with spaces to the right. It is required that numeric or integer fields be right-justified with leading zeroes.
5. All dates must be in the format yyymmdd - year, month, day
6. Duplicate records: If an ADD record of any type is received with an LME number, client number, and applicable date e.g. admit date, discharge date, diagnosis effective date matching a record already in the database, the record received will be rejected as a duplicate and returned to the LME.
7. Client number = Case number
8. The Data Dictionary enclosed with this document provides detailed information about each data element. The data element will be listed under the 'Data Dictionary Data Code' as described in the tables. This dictionary is for reference only; please use information in the reporting requirements if there is an apparent discrepancy between the dictionary and the requirements.

File Structure

1. A minimum of one file from each LME for each month is expected, however files can be sent on a daily basis.
2. Different types of records within the file have different lengths but, unless otherwise indicated, the record length is fixed for a given record type. However, filler at the end of each record is not required.
3. All records should be separated by a carriage return (HEX 0D). *This is an inherent byproduct of the WS_FTP software product and does not need to be programmed into the file if WS_FTP is used. For other FTP software, check manufacturer's specifications.*
4. The records should be sequenced by client number i.e. all record types for one client should be together, and in the same order in which the transactions occurred.

5. An end of file marker must be present at the end of the file, after the Trailer Record.
(HEX 1C). *This is an inherent byproduct of the WS_FTP software product and does not need to be programmed into the file if WS_FTP is used. For other FTP software, check manufacturer's specifications.*
 - Header Record - Mandatory
 - Various records (record type 10 through 88)
 - Trailer Record - Mandatory
6. All records updated or added in a month must be included in the monthly file; not just the latest ones for a consumer i.e. selection should be on last update date.
7. It is preferred that only those records that change are sent; however it is acceptable to send update records with no modified elements.

There are 12 possible records for transmission. These are:

Record Name	Record No.	Transmit Frequency
Header Record	00	Beg of file-Mandatory
Identifying Information	10, 30	Daily-Monthly
Screening Information	71,72,73	Daily -Monthly
Demographics	11, 31, 81	Daily -Monthly
Consumer Episode Completion (Discharge) Details	12, 32, 82	Daily -Monthly
Diagnosis Details	13, 33, 83	Daily -Monthly
Disability Details	14, 34, 84	Daily -Monthly
Special Population Details	15, 35, 85	Daily -Monthly
Risk Factor Details	16, 36, 86	Daily -Monthly
Substance Abuse Details	17, 37, 87	Daily -Monthly
Substance Abuse Treatment (Movement) Details	18, 38, 88	Daily -Monthly
Trailer Record	99	End of file-Mandatory

1n = Add new record

3n = Update existing record

8n = Delete erroneously sent record; **all fields on this record MUST match those on record being deleted or the delete record will be rejected.**

Name **Header Record Format****Description** This record provides identifying information including the process date and the data source (LME).**Frequency** First record of each file**Record Size** 15 Bytes**Rules** Mandatory in all files as first record

Sendne record:

- in each file
- the LME/process date combination must be unique. If the same file is sent more than once i.e. with the same LME/process date combination, the entire file will be rejected.

#	Data Name	Format	Data Dictionary Data Code	Mandatory /Optional	Position	Valid Values/Remarks
1.	Record Type	Char(2)		Mandatory	1-2	'00' : Header
2.	LME	Char(5)	cons_area_pgm_fac + area_pgm_code	Mandatory	3-7	
3.	Process Date	Char(8)		Mandatory	8-15	YYYYMMDD - Date file is created

Name **Trailer Record Format****Description** This record provides identifying information including the LME, the process date and number of records being transmitted**Frequency** Last record of each file**Record Size** 25 Bytes**Rules** Mandatory in all files as last record

Send one record:

- in each file

#	Data Name	Format	Data Dictionary Data Code	Mandatory /Optional	Position	Valid Values
1.	Record Type	Char(2)		Mandatory	1-2	'99' : Trailer
2.	LME	Char(5)	cons_area_pgm_fac + area_pgm_code	Mandatory	3-7	
3.	Process Date	Char(8)		Mandatory	8-15	YYYYMMDD - Date file is created
4.	Total Number of Records	Num(10)		Mandatory	16-25	9999999999 - including header and trailer record

Name **Identifying Information****Description** This record provides identifying information about consumers. This data will be used to:

- ensure that data received from different sources about the same consumer is associated with the same consumer in the warehouse and
- facilitate sharing data with other state systems as necessary for statistical analysis and planning.

This data will be stored in an encrypted format and will not be available on any reports or queries.

Frequency Daily**Record Size** 130 Bytes**Rules** Mandatory for all new consumers (clients).

Send a record:

- for each new consumer
- when a new identifier is collected or
- the existing identifier information is modified

- Notes**
1. This record can be sent in one of two alternate formats
 2. All of the different identifiers are described in the Data Dictionary under the data element 'Identifier'.

Format 1

#	Data Name	Format	Data Dictionary Data Code	Key Field	Mandatory /Optional	Position	Valid Values
1.	Record Type	Char(2)			Mandatory	1-2	'10' : Add '30' : Update
2.	Identifier Type 01	Char(1)	identifier_type	Yes	Mandatory	3	'A' : LME
3.	LME	Char(5)	cons_area_pgm_fac + area_pgm_code	Yes	Mandatory	4-8	
4.	Client Number	Char(10)	cons_id_identifier	Yes	Mandatory	9-18	LME Client Record Number - Case Number
5.	Identifier Type 02	Char(1)	identifier_type		Mandatory	19	'U' : Unique Identifier

6.	Unique Identifier	Char(15)	cons_id_identifier		Mandatory	20-34	Used by most DMH systems - consists of first three characters of last (maiden) name, first character of first name, six character birth date, and an identifier if more than one consumer with same id
7.	Identifier Type 03	Char(1)	identifier_type		Optional	35	'S' : SSN Blank
8.	SSN	Char(15)	cons_id_identifier		Mandatory if the previous field = 'S'	36-50	Nine digit numeric Encrypted
9.	Identifier Type 04	Char(1)	identifier_type		Optional	51	'D' : Driver License Blank
10.	Driver License	Char(15)	cons_id_identifier		Mandatory if the Previous field = 'D'	52-66	Non Blank
11.	Identifier Type 05	Char(1)	identifier_type		Optional	67	'M' : Medicaid Blank
12.	Medicaid Number	Char(15)	cons_id_identifier		Mandatory if the previous field = 'M'	68-82	Non Blank Encrypted
13.	Identifier Type 06	Char(1)	identifier_type		Optional	83-83	'R' : Medicare Blank
14.	Medicare Number	Char(15)	cons_id_identifier		Mandatory if the previous field = 'R'	84-98	Non Blank Encrypted
15.	Identifier Type 07	Char(1)	identifier_type		Future	99	
16.	Identifier	Char(15)	cons_id_identifier		Future	100-114	
17.	Identifier Type 08	Char(1)	identifier_type		Future	115	
18.	Identifier	Char(15)	cons_id_identifier		Future	116-130	

Identifying Information: Format 2

#	Data Name	Format	Data Dictionary Data Code	Key Field	Mandatory /Optional	Position	Valid Values
1.	Record Type	Char(2)			Mandatory	1-2	'10' : Add '30' : Update
2.	Identifier Type 01	Char(1)	identifier_type	Yes	Mandatory	3	'A' : LME
3.	LME	Char(5)	cons_area_pgm_fac + area_pgm_code	Yes	Mandatory	4-8	
4.	Client Number	Char(10)	cons_id_identifier	Yes	Mandatory	9-18	LME Client Record Number - Case Number
5.	Identifier Type 02	Char(1)	identifier_type		Mandatory	19	'U' : Unique Identifier
6.	Unique Identifier	Char(15)	cons_id_identifier		Mandatory	20-34	Used by most DMH systems - consists of first three characters of last (maiden) name, first character of first name, six character birth date, and an identifier if more than one consumer with same id
7.	Identifier Type	Char(1)	identifier_type		Optional	35	Valid Values 'U', 'S', 'D', 'M' and 'R'
8.	Identifier	Char(15)	cons_id_identifier		Mandatory if the previous field is non blank	36-50	This field should contain the value base on the contents of the previous filed. If the previous field is: 'S' : Encrypted Social Security Number 'D' : Drivers License Number 'M' : Encrypted Medicaid Number 'R' : Encrypted Medicare Number

Note: Fields 7,8 can occur 4 times to send a variety of identifiers in one record.

Name Screening**Description** This record provides screening, triage and descriptive information about consumers.**Frequency** Daily;**Record Size** 108 Bytes**Rules** Mandatory for all persons requesting a new episode of care

Send a record :

- When a screening has occurred and the client is not already being served by the LME or Contract Provider

#	Data Name	Format	Data Dictionary Data Code	Key Field	Mandatory /Optional	Position	Valid Values/Remarks
1.	Record Type	Char(2)			Mandatory	1-2	'71' : Add '72' : Update '73' : Delete
2.	LME	Char(5)	cons_area_pgm_fac + area_pgm_code	Yes	Mandatory	3-7	
3.	Client Number	Char(10)	cons_id_identifier	Yes	Mandatory	8-17	Case Number
4.	Screening Date	Char(8)	cons_scr_date	Yes	Mandatory	18-25	YYYYMMDD
5.	Access/Triage Timeline	Char(1)	access_timeline		Mandatory	26	E=Emergent, R=Routine, N=Non Threshold, U=Urgent
6.	Where Referred After Triage	Char(1)	where_ref_after_triag		Mandatory	27	E=Enhanced, B=Basic Benefit, C=Community Resources, R=Crisis
7.	Screening Time Begin	Char (4)	screen_time_begin		Mandatory	28-31	HHMM
8.	Screening Time End	Char (4)	screen_time_end		Mandatory	32-35	HHMM
9.	Screening Method	Char (1)	screen_method		Mandatory	36	F=Face to Face, T=Telephonic
10.	County of Residence	Char (3)	screen_county_resid		Mandatory	37-39	
11.	Currently Enrolled In Medicaid	Char (1)	screen_medicaid_enrollment		Mandatory	40	N=No, Y=Yes
12.	Presenting Age/Disability Problem 1	Char (2)	screen_pres_agedis_prob1		Mandatory	41-42	AM=Adult Mental Health CM=Child Mental Health AD=Adult Developmental Disability CD=Child Developmental Disability AS=Adult Substance Abuse CS=Child Substance Abuse

#	Data Name	Format	Data Dictionary Data Code	Key Field	Mandatory/ Optional	Position	Valid Values/Remarks
13.	Presenting Age/Disability Problem 2	Char (2)	screen_pres_agedis_prob2		Mandatory if applicable	43-44	AM=Adult Mental Health CM=Child Mental Health AD=Adult Developmental Disability CD=Child Developmental Disability AS=Adult Substance Abuse CS=Child Substance Abuse
14.	Presenting Age/Disability Problem 3	Char (2)	screen_pres_agedis_prob3		Mandatory if applicable	45-46	AM=Adult Mental Health CM=Child Mental Health AD=Adult Developmental Disability CD=Child Developmental Disability AS=Adult Substance Abuse CS=Child Substance Abuse
15.	Appointment Date	Char (8)	appoint_date		Mandatory if data item 6 is E, R, S	47-54	YYYYMMDD
16.	Appointment Time	Char (4)	appoint_time		Mandatory if data item 6 is E, R, S	55-58	HHMM
17.	How Provider Chosen	Char (1)	prov_chos_how		Mandatory	59	1-4
18.	Why Provider Chosen	Char (2)	prov_chos_why		Mandatory	60-61	01-09
19.	Accommodation of Special Consumer Needs	Char (2)	accom_for_handi		Mandatory	62-63	01-99
20.	Active Military, Reserve, National Guard Status	Char (1)	active_military_status		Mandatory	64	1-3
21.	Active Military Operation	Char (1)	active_military_operation		Mandatory	65	1-4
22.	Proficient in English	Char (1)	english-proficiency		Mandatory	66	N=No Y=Yes
23.	Primary Language	Char (1)	primary_language		Mandatory	67	E,L,F,S,O,N
24.	Filler	Char (41)			Optional	68-108	Spaces

Name **Demographics****Description** This record provides admission and descriptive information about consumers.**Frequency** Daily**Record Size** 108 Bytes**Rules** Mandatory for all new consumers (clients) who are receiving Crisis Services or are a presumed member of a target population

Send a record :

- for each new consumer (episode of care)
- when new data is collected
- when the existing demographic information is modified
- when an admission is deleted

#	Data Name	Format	Data Dictionary Data Code	Key Field	Mandatory /Optional	Position	Valid Values/Remarks
25.	Record Type	Char(2)			Mandatory	1-2	'11' : Add '31' : Update '81' : Delete
	LME	Char(5)	cons_area_pgm_fac + area_pgm_code	Yes	Mandatory	3-7	
27.	Client Number	Char(10)	cons_id_identifier	Yes	Mandatory	8-17	Case Number
28.	Admission Date	Char(8)	cons_adm_date	Yes	Mandatory	18-25	YYYYMMDD
29.	County of Residence	Char(3)	cons_county_reside; county_code		Mandatory	26-28	
30.	Date of Birth	Char(8)	cons_date_of_birth		Mandatory	29-36	Mandatory for Add and Update
31.	Ethnicity	Char(2)	ethnicity		Mandatory	37-38	
32.	Marital Status	Char(1)	marital_status		Mandatory	39	
33.	Race	Char(1)	race		Mandatory	40	
34.	Gender	Char(1)	gender		Mandatory	41	
35.	State of Residence	Char(2)	state_of_residence		Optional	42-43	
36.	Ability to Pay	Char(1)	ability_to_pay		Optional	44	"U"=unknown
37.	Commitment Status	Char(3)	commit_status_ap		Optional	45-47	
38.	Competency Status	Char(1)	competency_status		Optional	48	

#	Data Name	Format	Data Dictionary Data Code	Key Field	Mandatory /Optional	Position	Valid Values/Remarks
39.	Court Order Type	Char(1)	court_order_type		Optional	49	7 = Assessment & evaluation 8 = Evaluation & treatment 9 = Treatment 0=None
40.	Employer Assisted Program (EAP) Employer Code	Char(3)	eap_code		Optional	50-52	
41.	Education Level at Admission	Char(2)	education_level		Mandatory	53-54	
42.	Employment Status	Char(2)	employment_status		Mandatory	55-56	
43.	Living Arrangement	Char(2)	living_arrang		Mandatory	57-58	
44.	Admission Referral Source	Char(2)	adm_ref_src		Mandatory	59-60	
45.	Veteran Status	Char(1)	cons_veteran_status		Mandatory	61	
46.	Consumer Status	Char(1)	consv_status		Mandatory	62	Send 'D' if admission is to be deleted for record type '31'
47.	Consumer Status Date	Char(8)	cons_status_date		Mandatory	63-70	YYYYMMDD
48.	Last Served Date	Char(8)	cons_last_served_date		Optional	71-78	YYYYMMDD must be >= Admit Date and <= Discharge Date, if present
49.	Accommodation for Special Needs	Char(2)	accomm_for_handi		Mandatory	79-80	
50.	English Proficiency	Char(1)	english_proficiency		Mandatory	81	N=No Y=Yes
51.	Primary Language	Char(1)	primary_language		Mandatory	82	E,L,F,S,O,N
52.	Legally Responsible Person	Char(2)	legally_resp_person		Optional	83-84	
53.	Zip Code	Char(9)	zipcode		Mandatory	85-93	
54.	Family Income	Char(8)	family_income		Mandatory if Non- Medicaid	94-101	

#	Data Name	Format	Data Dictionary Data Code	Key Field	Mandatory /Optional	Position	Valid Values/Remarks
55.	Family Size	Char(2)	family_size		Mandatory if Non- Medicaid	102-103	
56.	Arrests In 30 Days Prior To Admission	Char(2)	arrests_30_days		Mandatory	104-105	
57.	Health/Medical Insurance	Char (1)	health_med_ins		Mandatory	106	1-9
58.	Filler	Char (2)			Optional	107-108	Spaces

Name	Consumer Episode Completion (Discharge) Details	NOTE: Record Length has been increased to 70
Description	This record provides information on discharged consumers.	
Frequency	Daily	
Record Size	40 Bytes	
Rules	<p>This record is mandatory for all consumers who have completed an episode of care (discharged) during the reporting period.</p> <p>Send a record</p> <ul style="list-style-type: none"> When a client completes an episode of care (discharged) during the report period. An episode of care is defined by the end of service (60 days uninterrupted time period when there is no billable service for the client IPRS or Medicaid), except for the Adult Mental Health Stable Recovery Population clients who may experience up to a 365 day break in service before a discharge record is required. Substance Abuse client who are identified as appropriate to report to the TEDS (Treatment Episodes Data System) will receive particular scrutiny by being identified in a tracking report and monitored in the Performance Contract. 	

#	Data Name	Format	Data Dictionary Data Code	Key Field	Mandatory /Optional	Position	Valid Values/Remarks
1.	Record Type	Char(2)			Mandatory	1-2	'12': Add '32': Update '82': Delete
2.	LME	Char(5)	cons_area_pgm_fac + area_pgm_code	Yes	Mandatory	3-7	
3.	Client Number	Char(10)	cons_id_identifier	Yes	Mandatory	8-17	Case Number
4.	Discharge Date	Char(8)	cons_status_date		Mandatory	18-25	YYYYMMDD must be >= Admit Date
5.	Discharge Reason	Char(1)	dischv_reason		Mandatory	26	
6.	Discharge Referral To	Char(2)	dischv_ref_src; adm_ref_src		Mandatory	27-28	
7.	Discharge Living Arrangement	Char(2)	living_arrang		Mandatory	29-30	
8.	Discharge Employment Status	Char(2)	employment-status		Mandatory	31-32	
9.	Arrests In The 30 days Prior To Discharge	Char(2)	arrests_30_days		Mandatory	33-34	
10.	Date of Last Service	Char (8)	cons_last_served_date		Mandatory	35-42	YYYYMMDD must be >= Admit Date and <= Last Discharge Date
11.	Filler	Char(6)			Optional	43-70	Spaces

Name **Diagnosis Details (This record is required for selected clients). DMH/DD/SAS requires that these records (13, 33, 83) be sent for Non-UCR, Private Pay, and TNC**

Description This record provides diagnostic information about consumers.

Frequency Daily

Record Size 60 Bytes

Rules Send a record

- for each new diagnosis identified during the reporting period for each consumer
- if the end date is updated for a diagnosis i.e. it is determined that a diagnosis is no longer appropriate for a consumer
- for clients for whom an IPRS or Medicaid claim cannot be matched
- for clients for whom there has been a 60 day break in service (except Adult Mental Health Stable Recovery Population) that are still active

#	Data Name	Format	Data Dictionary Data Code	Key Field	Mandatory /Optional	Position	Valid Values/Remarks
1.	Record Type	Char(2)			Mandatory	1-2	'13' : Add '33' : Update '83' : Delete
2.	LME	Char(5)	cons_area_pgm_fac + area_pgm_code	Yes	Mandatory	3-7	
3.	Client Number	Char(10)	cons_id_identifier	Yes	Mandatory	8-17	Case Number
4.	Diagnosis Effective Date	Char(8)	diag_start_date	Yes	Mandatory	18-25	YYYYMMDD
5.	Diagnosis Order	Char(1)	diagv_class	Yes	Mandatory	26	Order of Importance 1-9, A-Z 1 = P (Principle) 2-6 = R (Primary) 7 or greater = A (Additional)
6.	Diagnosis Code	Char(10)	diagv_code_num	Yes	Mandatory	27-36	Numbers only; do not send decimals
7.	Diagnosis Axis Code	Char(1)	diagv_axis_code	Yes	Optional	37	
8.	Pregnancy Status	Char(1)	Stored as special population = 'P' specv_type		Mandatory if Gender = 'F'	38	Y = Yes N = No
9.	Diagnosis End Date	Char(8)	diag_end_date		Optional	39-46	If sent, in YYYYMMDD format. Cannot be future date.
10.	Filler	Char(14)			Optional	47-60	Spaces

Name Disability Details (This record is optional). DMH/DD/SAS no longer requires that these records (14, 34, 84) be sent.

Description This record provides disability information about consumers.

Frequency Daily

Discontinued

Record Size 70 Bytes

Rules

Send a record

- for each new disability identified during the reporting period for each consumer
- for any disability information updated during the reporting period
- if you choose to report, all current processing rules will remain in effect

#	Data Name	Format	Data Dictionary Data Code	Key Field	Mandatory /Optional	Position	Valid Values/Remarks
1.	Record Type	Char(2)			Mandatory	1-2	'14' : Add '34' : Update '84' : Delete
2.	LME	Char(5)	cons_area_pgm_fac + area_pgm_code	Yes	Mandatory	3-7

13.	Disability Functional Assessment Scale 2	Char(1)	disav_fa_scale		Optional	53	
14.	Disability End Date	Char(8)	disa_end_date		Optional	54-61	If sent, in YYYYMMDD format. Future dates permitted for compliance with IPRS.
15.	Filler	Char(10)			Optional	61-70	Spaces

Name Special Population Details (This record is optional). DMH/DD/SAS no longer requires that these records (15,35,85) be sent.

Description One record is provided for each special population to which a consumer belongs. Any number of special population records can be sent for a consumer.

Frequency Daily

Discontinued

Record Size 40 Bytes

Rules

Send a record

- this record is required only if a consumer belongs to a special population as defined in the Data Dictionary, it is not required for every consumer
- for each special population identified for a consumer during the reporting period
- when an existing special population is no longer valid for a consumer
- if you choose to report, all current processing rules will remain in effect

*Note: For female clients with principle or primary diagnosis of substance abuse, and pregnancy status of 'Y', this record will automatically be generated by our system, however sending a '15' will not result in an error.

#	Data Name	Format	Data Dictionary Data Code	Key Field	Mandatory /Optional	Position	Valid Values/Remarks
1.	Record Type	Char(2)			Mandatory	1-2	'15' : Add '35' : Update '85' : Delete
2.	LME	Char(5)	cons_area_pgm_fac + area_pgm_code	Yes	Mandatory	3-7	
3.	Client Number	Char(10)	cons_id_identifier	Yes	Mandatory	8-17	Case Number
4.	Special Population Type	Char(1)	specv_type	Yes	Mandatory	18	
5.	Special Population Start Date	Char(8)	spec_start_date	Yes	Mandatory	19-26	YYYYMMDD
6.	Special Population End Date	Char(8)	spec_end_date		Optional	27-34	If sent, in YYYYMMDD format Cannot be future date.
7.	Filler	Char(6)			Optional	35-40	Spaces

Name Risk Factor Details(This record is optional). DMH/DD/SAS no longer requires that these records (16, 36, 86) be sent.

Description Up to 12 risk factors can be identified for a child . These are used for the Governor's At Risk Report.

Frequency Daily

Discontinued

Record Size 50 Bytes

Rules

Send one record

- this record is required only if a consumer is in one of these Risk groups as defined in the Data Dictionary, it is not required for every consumer
- when the risk factors are collected or updated for a consumer during the reporting period
- if record is provided, at least one Risk Factor is expected
- update record replaces all existing risk factors

#	Data Name	Format	Data Dictionary Data Code	Key Field	Mandatory /Optional	Position	Valid Values/Remarks
1.	Record Type	Char(2)			Mandatory	1-2	'16' : Add '36' : Update '86' : Delete
2.	LME	Char(5)	cons_area_pgm_fac + area_pgm_code	Yes	Mandatory	2-7	
3.	Client Number	Char(10)	cons_id_identifier	Yes	Mandatory	8-17	Case Number
4.	Risk Factor 1	Char(2)	riskv_factor		Mandatory	18-19	
5.	Risk Factor 2	Char(2)	riskv_factor		Optional	20-21	
6.	Risk Factor 3	Char(2)	riskv_factor		Optional	22-23	
7.	Risk Factor 4	Char(2)	riskv_factor		Optional	24-25	
8.	Risk Factor 5	Char(2)	riskv_factor		Optional	26-27	
9.	Risk Factor 6	Char(2)	riskv_factor		Optional	28-29	
10.	Risk Factor 7	Char(2)	riskv_factor		Optional	30-31	
11.	Risk Factor 8	Char(2)	riskv_factor		Optional	32-33	
12.	Risk Factor 9	Char(2)	riskv_factor		Optional	34-35	
13.	Risk Factor 10	Char(2)	riskv_factor		Optional	36-37	
14.	Risk Factor 11	Char(2)	riskv_factor		Optional	38-39	
15.	Risk Factor 12	Char(2)	riskv_factor		Optional	40-41	
16.	Filler	Char(9)			Optional	42-50	Spaces

Name **Substance Abuse (Drug of Choice) Details**

Description This record provides substance abuse information for all consumers who receive a substance abuse service (SA Target Pop Group or SA Principal Diagnosis). It is required within 60 days of beginning date of service for clients enrolled in a SA Target Pop Group or SA Principal Diagnosis and it also required when a substance abuse client is discharged.

Frequency Daily

Record Size 50 Bytes

Rules Send a record

- for any new consumer who receives a substance abuse service (SA Target Pop Group or SA Principal Diagnosis)
- for any new drug of choice identified during the reporting period for each consumer
- when the existing substance abuse information is updated
- **when a record type 12 (Discharge Details) or a record type 18 (Substance Abuse Treatment Details) is sent for an SA client**

#	Data Name	Format	Data Dictionary Data Code	Key Field	Mandatory /Optional	Position	Valid Values/Remarks
1.	Record Type	Char(2)			Mandatory	1-2	'17' : Add '37' : Update '87' : Delete
2.	LME	Char(5)	cons_area_pgm_fac + area_pgm_code	Yes	Mandatory	3-7	
3.	Client Number	Char(10)	cons_id_identifier	Yes	Mandatory	8-17	Case Number
4.	Substance Abuse Start Date	Char(8)	sa_start_date	Yes	Mandatory	18-25	YYYYMMDD
5.	Substance Abuse Drug Code	Char(2)	sav_drug_code	Yes	Mandatory	26-27	
6.	Substance Abuse Drug Age at First Use	Char(2)	sav_age_first_use		Mandatory	28-29	
7.	Substance Abuse Drug Use Frequency	Char(1)	sav_drug_frequency		Mandatory	30	
8.	Substance Abuse Drug Use Route	Char(1)	sav_drug_use_route		Mandatory	31	
9.	Substance Abuse Drug Use Class	Char(1)	sav_drug_use_class	Yes	Mandatory	32	
10.	Substance Abuse End Date	Char(8)	sa_end_date		Optional	33-40	YYYYMMDD. Cannot be future date.
11.	Substance Abuse Transaction Type	Char(1)	sav_drug_trans_type		Mandatory	41	A, T, D
12.	Filler	Char(10)			Optional	42-50	Spaces

Name Substance Abuse Treatment (Movement) Details**Description** This record provides substance abuse information for consumers who continue to receive a substance abuse service.**Frequency** Daily**Record Size** 50 Bytes**Rules**

Send a record

- If an SA client has been identified as having no billable service in 60 days, but the LME has determined that the client should not be discharged, submission of a Substance Abuse Treatment (Movement) Details record (type 18) will identify that the client is still actively receiving services. Note: In addition to the substance Abuse Treatment (Movement) Details record, a Diagnosis Details (13) and a Substance Abuse (Drug of Choice) Details Record (17) must be sent.

#	Data Name	Format	Data Dictionary Data Code	Key Field	Mandatory /Optional	Position	Valid Values/Remarks
1.	Record Type	Char(2)			Mandatory	1-2	'18' : Add '38' : Update '88' : Delete
2.	LME	Char(5)	cons_area_pgm_fac + area_pgm_code	Yes	Mandatory	3-7	
3.	Client Number	Char(10)	cons_id_identifier	Yes	Mandatory	8-17	Case Number
4.	SA Treatment (Movement) Start Date	Char(8)	samo_start_date	Yes	Mandatory	18-25	YYYYMMDD
5.	Federal Service Type	Char(2)	federal_service_type	Yes	Mandatory	26-27	
6.	Methadone Planned Indicator	Char(1)	samo_meth_plan_ind		Mandatory	28	
7.	UFDS/ISATS Code	Char(8)	ufds_code		Mandatory	29-36	
8.	SA Treatment (Movement) End (Release) Date	Char(8)	samo_end_date		Optional	37-44	YYYYMMDD Cannot be future date.
9.	Filler	Char(6)			Optional	45-50	Spaces

Reading the Data Dictionary

Following is a key to reading and understanding the attached data dictionary. Please note that the dictionary is written to facilitate the technical aspects of the data; therefore, there might be some parts of it that are not clear or not consistent with the LME Reporting Requirements. Please use the Reporting Requirements as your correct source of information; this dictionary is for reference only.

Table Code:	Table data element resides on
Name:	Long data element name
Code:	Data dictionary's code for data element; referenced in above tables. Dictionary is alphabetized by this code.
Label:	Indicates if data element is MANDATORY, OPTIONAL, or DERIVED, on the particular table in the data dictionary. Do not use this to determine LME submission requirements; use the instructions in the reporting requirements above. Ignore those data elements that are labeled 'INSTITUTION ONLY' or 'DERIVED'; these do not apply to LME's.
Domain:	N/A
Type:	indicates type and length of field: Char = alphanumeric field Datetime = date and time field Integer = number with no decimals
Description:	Definition/description of the data element including valid values and edits. This is the area in which to find detailed descriptions and valid values for reporting.
Annotation:	Data migration - processes, notes, etc. for converting data element from current Client Information System. Post migration - processes, notes, etc. pertaining to the regular processing or loading of data into the CDW; used to write load programs.

Operational InstructionsDeadlines and Schedules*User Acceptance Test Files*

- Test system is refreshed with Production data each morning.
- Test files can be sent daily, but the same file can only be sent once per day.
- Test files will be processed as part of a nightly batch cycle after normal business hours.
- Test error files will be available for download the next day (after processing).
- Test error files will be deleted after no more than five business days due to space considerations.

Production Files

- Production files can be sent daily, with a limit of one file per day, M-F.
- All data files must be dated greater than ANY previous data file which has been processed.
- Production files will be processed as part of a nightly batch cycle after normal business hours.
- Production error files will be available for download the next day (after processing).
- Production error files will be deleted after no more than five business days due to space considerations.

Processing Limitations

The only limits for sending data to be processed are those set forth by the **LME Performance Agreement** (stipulates that data files are due by the 15th of the month), unless otherwise noted above. There is no longer a monthly batch process by which data needs to be received, in order to be processed. All data is processed nightly by automated batch systems.

System Access and FTP*Userid's and Passwords*

Userid's

- Each LME will have it's own userid's and password's. This will connect you to your own subdirectory on the UNIX machine at SIPS.
- For Production, The UNIX userid will be **apnnn** where nnn= LME number. For example, the UNIX userid for Smoky Mountain will be ap101.
- For Test, The UNIX userid will be **apnnnt** where nnn= LME number and the constant, **t** represents "test". For example, the UNIX userid for Smoky Mountain will be ap101t.

Please note that in the UNIX world, there is a difference between upper case and lower case. All userids and passwords will be all lower case. If upper case is entered, you will get an error.

Listed below are all LME. Please let us know immediately if any of these are incorrect.

101	Smoky Mountain/New River
105	Foothills
108	Pathways
109	Catawba/Burke County
110	Mecklenburg
112	Piedmont
113	Western Highlands
201	Crossroads
202	CenterPointe
204	Guilford
205	Alamance-Caswell/Rockingham
206	O-P-C (Orange, Person, Chatham)
207	Durham
208	Five County Mental Health Authority
303	Sandhills Center
304	Southeastern Regional
305	Cumberland
307	Johnston
308	Wake
401	Southeastern Center
402	Onslow/Carteret
404	Beacon Center
405	Beacon Center
407	East Carolina Behavioral Health
412	Tideland/Albemarle

Passwords

Please contact Data Operations for password information and follow the TELNET instructions below to change your password as quickly as possible.

Again, please note that in the UNIX world, there is a difference between upper case and lower case. All userids and passwords will be all lower case. If upper case is entered, you will get an error.

In the future, to change your password (or for System/Communication problems) please contact:

ITS Help Desk @ 919-872-8841 or 1-800-722-3946 and ask for UNIX Support.

To change a password, the following information must be provided:

- LME number and name
- Your name and phone number
- Current password

In addition you must use **TELNET** to maintain and change passwords. If a new password is granted, it is just temporary and must be changed upon first use. Go to **TELNET** where upon entering the temporary password, you will be prompted to enter a new one. This ensures security, so that not even ITS will know your password.

Host Name, Files, and Subdirectories

Host

The host name for the UNIX box is:

scc01b.its.state.nc.us – for Test data
scc03b.its.state.nc.us – for Production data

This is the name to use when FTPing.

Note: SIMPC will not work for this system.

Files and Subdirectories

Each LME will have access to its own subdirectory only. You will be allowed to create files on this subdirectory; **modification of existing (previously sent) files will not be allowed.** If you send an erroneous file and you want it deleted **BEFORE** it is loaded to the CDW, you have the authority to remove the file from our system.

The files FTP'ed to the division must be in binary format . The following names must be used:

apnnn_ccyyymmdd.dat.gpg (Encrypted Area Program Data File)

where
apnnn = UNIX userid i.e. LME number
ccyy = 4 character year.
mm = month
dd = day

apnnn_ccyyymmdd.err.gpg (Encrypted Area Program Error Report)

where
apnnn = UNIX userid
ccyy = 4 character year.
mm = month
dd = day

apnnn_ccyyymmdd.err.dat.gpg (Encrypted Area Program Error Data File)

where
apnnn = UNIX userid
ccyy = 4 character year.
mm = month
dd = day

Error Files Returned to LME

Each record in the error file will contain the error transaction, in the same format as sent, followed by the error message. There will be total number of transactions record at the end.

In addition to the above error files, a Batch Control file containing statistics for each LME will be provided under the following format and naming convention:

apnnn_ccyyymmdd.ctl.gpg (Encrypted Area Program Batch Control Statistics)

where
apnnn = UNIX userid
ccyy = 4 character year.
mm = month
dd = day
